

December News for Ancillary Education

Technology

with Mr. Santana

HOOR of Code - Week of December 4 to December 8, 2017

- Come join us in learning how to code!

K-2nd grade students are going to review their Google accounts and learn how to access their email and Google applications. In these grades the classes will finalize their work with course one in Tynker.com.

3rd - 8th Grade:
Students will continue to work with their respective computer science courses in Tynker.com. All classes should refer to the work assigned in their Google Classroom home page.

MUSIC

With Mr. Stillmunks

All students are working hard to prepare their songs and dances for the annual Winter Showcase performance!

We hope to see you there!

Physical Education

with Ms. Militello

Happy Winter! The weather is cooling down, but things keep heating up in Chase Elementary's gym. Our students continue to get their heart rates up and enjoy individual and group aerobic games.

Additionally, all students kinder-8th grade will receive comprehensive sexual health education in February. Watch for a letter home in January. If you have questions, please ask!

World Language

with Ms. Lux

December is filled with activities and fun...and also some assessments!

In December, we have Hour of Code, the Winter Showcase, and in World Language, we are researching inspirational people of Hispanic/Latino descent. Students are practicing research skills, writing skills, technology skills, and presentation skills while learning the importance of role models of all cultures.

Students will also be taking the Middle of the Year assessment that measures reading and understanding of informational text. The results of this assessment give me information to help me teach the students for even more success.

Over break, students need to read EVERY DAY!!!! We may get a break from school, but we need to keep our brains active by reading and thinking.
